Announcing the 2nd Annual Yale-Rigaku Symposium

The Yale University Department of Chemistry, in conjunction with Rigaku Americas Corporation, is pleased to announce the 2nd Annual Yale-Rigaku Symposium on X-ray Diffraction to take place on Friday, June 18, 2010 in Sterling Chemistry Laboratory on Yale Campus.

Last year's inaugural event was highly successful, and we look forward to another year of exciting talks and posters. More than 100 attendees [participated in 2009](#) and we are anticipating even more!

This event will explore current analytical and technological trends in X-ray diffraction. Topics ranging from Chemical Crystallography to Materials Analysis will be presented by experts in the field, and "hands-on" workshops will be held in Yale's Center for Crystallography.

Our outstanding speakers for 2010 are:

[Professor Philip Coppens](#) - Department of Chemistry, SUNY Buffalo

[Dr. Lee Daniels](#) - Rigaku Americas Corporation

[Professor Nilay Hazari](#) - Department of Chemistry, Yale University.

[Professor Adam Matzger](#) - Department of Chemistry, The University of Michigan

[Aya Takase](#) - Rigaku Americas Corporation

In addition to the guest speaker presentations and workshops, we are accepting submissions for poster presentations that focus on X-ray analysis. A prize will be awarded for the most outstanding poster, generously provided by Rigaku Americas Corporation.

Please join us for a day of stimulating talks and networking. This event is free and open to the public, but [pre-registration is required](#). Breakfast, lunch and an evening reception are included during the Symposium.

We hope to see you there.

Christopher D. Incarvito, Ph.D.
